

Git & GitHub Assignment - Employee Management Project

Objective: Practice Git & GitHub basics including setup, repository creation, file tracking, push, and clone.

Task 1: Configure Git

Verify Git installation and configure your username and email.

```
DELL@DESKTOP-JS09E04 MINGW64 ~  
$ git --version  
git version 2.45.2.windows.1  
  
DELL@DESKTOP-JS09E04 MINGW64 ~  
$ git config --global user.name "AkankshaR19"  
  
DELL@DESKTOP-JS09E04 MINGW64 ~  
$ git config --global user.email "21051195@kiit.ac.in"
```

Task 2: Create Local Project

Create a new folder for the employee management project and initialize it as a Git repository.

```
KIIT@ARYA MINGW64 ~/employee-management (main)  
$ mkdir employee-management  
cd employee-management  
git init  
Initialized empty Git repository in C:/Users/KIIT/employee-management/employee-management/.git/
```

Task 3: Create Employee File

Create a file named employees.txt and add employee details such as ID, Name, and Role.

```
KIIT@DESKTOP-HS2QJ56 MINGW64 ~/SeleniumFramework/employee-management (main)  
$ echo "101,Akanksha,Developer" > employees.txt  
echo "102,Rahul,Tester" >> employees.txt  
echo "103,Priya,Manager" >> employees.txt
```

Task 4: Track Changes

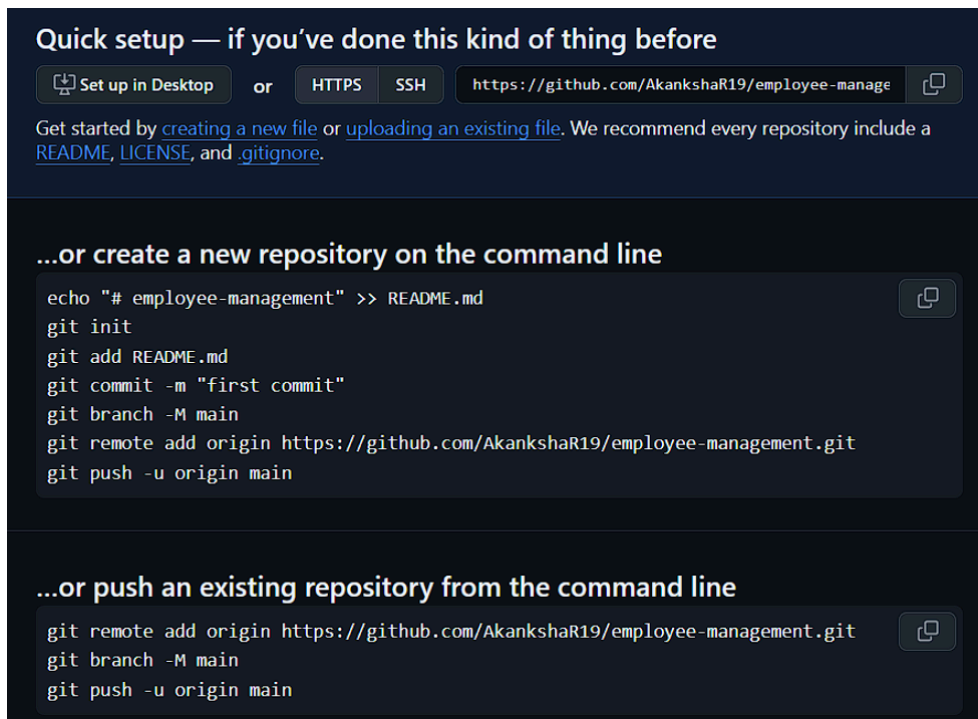

Check the status of your project, add the employee file to tracking, and commit the changes.

```
DELL@DESKTOP-JS09E04 MINGW64 ~/employee-management (main)  
$ git status  
On branch main  
Your branch is up to date with 'origin/main'.  
  
Changes to be committed:  
  (use "git restore --staged <file>..." to unstage)  
    modified:   employees.txt  
  
DELL@DESKTOP-JS09E04 MINGW64 ~/employee-management (main)  
$ git commit -m "Added employee details"  
[main edf5b18] Added employee details  
1 file changed, 3 insertions(+), 5 deletions(-)  
  
DELL@DESKTOP-JS09E04 MINGW64 ~/employee-management (main)  
$ git push  
Enumerating objects: 5, done.  
Counting objects: 100% (5/5), done.

```

Git & GitHub Assignment - Employee Management Project

Task 5: Create GitHub Repository

Go to GitHub and create a new repository named 'employee-management'.

The screenshot shows the GitHub 'Quick setup' interface. At the top, it says 'Quick setup — if you've done this kind of thing before'. Below this, there are three options: 'Set up in Desktop', 'HTTPS', and 'SSH'. The 'SSH' option is selected, and the URL 'https://github.com/AkankshaR19/employee-manage' is shown. Below the options, it says 'Get started by creating a new file or uploading an existing file. We recommend every repository include a README, LICENSE, and .gitignore.' Below this, there are two sections: '...or create a new repository on the command line' and '...or push an existing repository from the command line'. Each section contains a list of terminal commands to create and push a new repository.

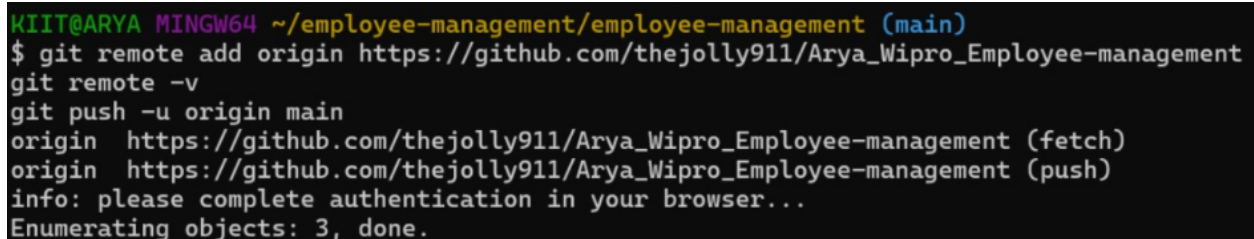

```
echo "# employee-management" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/AkankshaR19/employee-management.git
git push -u origin main
```

```
git remote add origin https://github.com/AkankshaR19/employee-management.git
git branch -M main
git push -u origin main
```

<https://github.com/AkankshaR19/employee-management>

Task 6: Connect and Push

Connect your local project to the GitHub repository and push your changes.

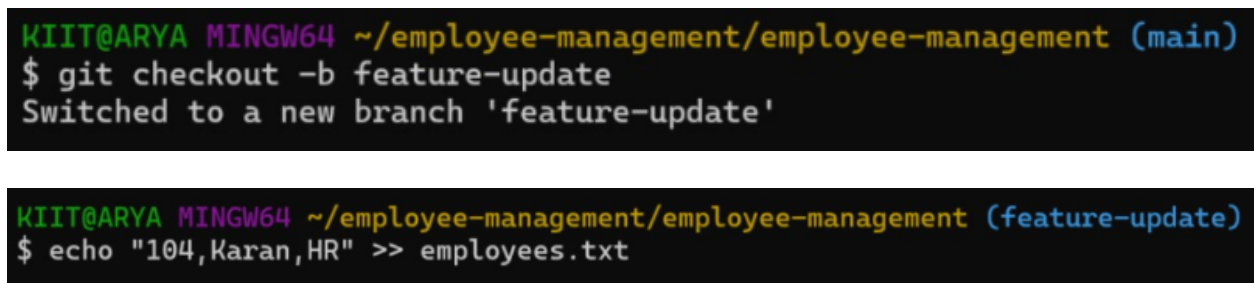

The screenshot shows a terminal window with the following output:

```
KIIT@ARYA MINGW64 ~/employee-management/employee-management (main)
$ git remote add origin https://github.com/thejolly911/Arya_Wipro_Employee-management
git remote -v
git push -u origin main
origin https://github.com/thejolly911/Arya_Wipro_Employee-management (fetch)
origin https://github.com/thejolly911/Arya_Wipro_Employee-management (push)
info: please complete authentication in your browser...
Enumerating objects: 3, done.
```

Task 7: Update File

Add a new employee to the file and update the repository with the changes. Create a new branch, make changes, and push it to GitHub.

The screenshot shows a terminal window with the following output:

```
KIIT@ARYA MINGW64 ~/employee-management/employee-management (main)
$ git checkout -b feature-update
Switched to a new branch 'feature-update'
```

```
KIIT@ARYA MINGW64 ~/employee-management/employee-management (feature-update)
$ echo "104,Karan,HR" >> employees.txt
```

Git & GitHub Assignment - Employee Management Project

```
KIIT@DESKTOP-HS2QJ56 MINGW64 ~/SeleniumFramework/employee-management (main)
$ cat employees.txt
101,Akanksha,Developer
102,Rahul,Tester
103,Priya,Manager
104,Karan,HR
```

```
KIIT@ARYA MINGW64 ~/employee-management/employee-management (feature-update)
$ git add .
git commit -m "Added HR employee"
warning: in the working copy of 'employees.txt', LF will be replaced by CRLF the next time Git touches it
[feature-update cd83dd1] Added HR employee
1 file changed, 1 insertion(+)
```

```
KIIT@ARYA MINGW64 ~/employee-management/employee-management (feature-update)
$ git log --oneline
cd83dd1 (HEAD -> feature-update) Added HR employee
e52632f (origin/main, main) Added employee details

KIIT@ARYA MINGW64 ~/employee-management/employee-management (feature-update)
$ git push -u origin feature-update

Git & GitHub Assignment - Employee Management Project

Task 8: Clone Repository

Clone the repository to another location or system and verify the files.

```
KIIT@DESKTOP-HS2QJ56 MINGW64 ~/SeleniumFramework/employee-management (main)
$ cd ..

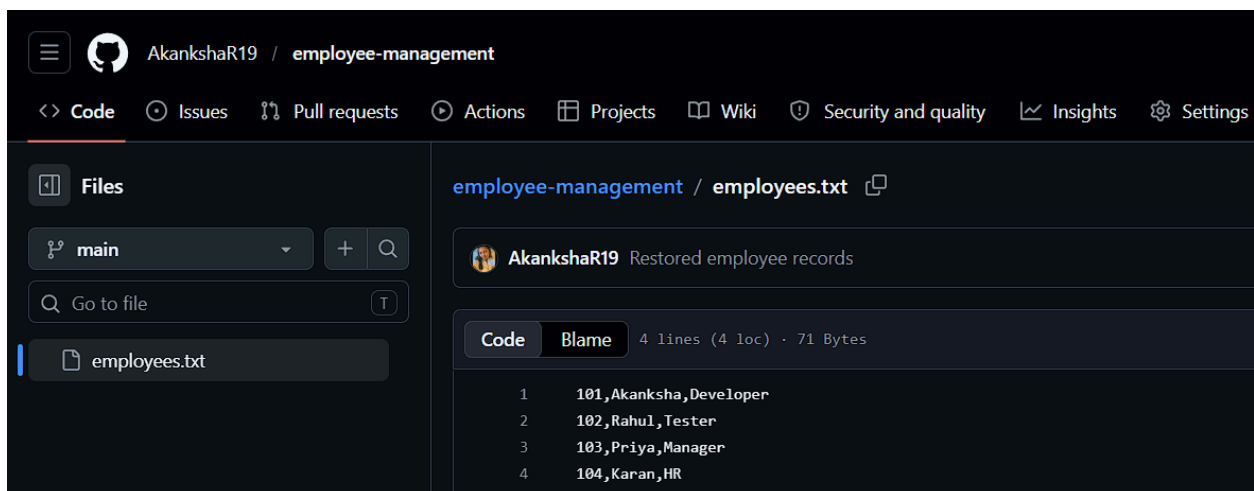

KIIT@DESKTOP-HS2QJ56 MINGW64 ~/SeleniumFramework (master)
$ git clone https://github.com/AkankshaR19/employee-management.git employee-management-clone
Cloning into 'employee-management-clone'...
remote: Enumerating objects: 9, done.
remote: Counting objects: 100% (9/9), done.
remote: Compressing objects: 100% (5/5), done.

Receiving objects: 100% (9/9), done.
Resolving deltas: 100% (1/1), done.

KIIT@DESKTOP-HS2QJ56 MINGW64 ~/SeleniumFramework (master)
$ cd employee-management-clone

KIIT@DESKTOP-HS2QJ56 MINGW64 ~/SeleniumFramework/employee-management-clone (main)
$ cat employees.txt
101,Akanksha,Developer
102,Rahul,Tester
103,Priya,Manager
104,Karan,HR

KIIT@DESKTOP-HS2QJ56 MINGW64 ~/SeleniumFramework/employee-management-clone (main)
$ git log --oneline
2243459 (HEAD -> main, origin/main, origin/HEAD) Restored employee records
5b0f00b (origin/feature-update) Added HR employee
237db01 Added employee details
```

INSIDE GIT REPO

The screenshot displays the GitHub web interface for the repository 'employee-management' owned by 'AkankshaR19'. The 'Code' tab is active, showing the file 'employees.txt'. The file content is displayed as follows:

```
101,Akanksha,Developer
102,Rahul,Tester
103,Priya,Manager
104,Karan,HR
```

The commit history is visible, showing the latest commit '2243459 (HEAD -> main, origin/main, origin/HEAD) Restored employee records'.
